COMMUNITY-POT-LOTS LIST, CONT'D.

Page 3-B

- #290 C. LAURIE LYNN WESTERBERGER (C. Bob Betts X Claesiana alba) - The kind of White Orchid most florists love for wedding work, as it is heavy, bold, medium size, with very little yellow in the throat.
- #316 LC SLENDERELLA X C. CLAESIANA ALBA - The rich orange-gold pod parent being of the dominant Laelia type should influence most of the offspring to be strong yellows with no other color showing. Spring.
- #878 LC GOLDEN CORN X MAX PALM, JR. - Wide color variations expected, from yellow to bronze to rich red shades, all with large size and big, showy, very dark lips. The lip on the pod parent was the nearest to BLACK I've seen on an Orchid! Summer, Autumn season.
- #880 C. KING GEORGE X LC SUNBURST X MOONBEAM - King George is the most free-flowering of the unifoliate yellow Cattleyas. Pleasing yellow-veined rose in lip. The pollen parent is heavy golden yellow with fan of rich rose in lip. June.
- #905 C. WEDDING DAY X PEARL HARBOR - Large, heavy Whites for the June Wedding Season; some gold in throat.
- #906 C. KING GEORGE X BLC JANE HELTON - Strong, free-flowering Blc Yellows for early Summer season, Pastel old rose lip markings.
- #917 LC WESTWOOD X LC HELEN WILMER 'VICTORY' - As usual, the tetraploid Helen Wilmer is expected to dominate this cross, and that isn't bad. For big, well rounded, brilliant dark lavender to purples with full, dark, showy lips, this is your ticket. Winter or twice yearly.
- #944 BLC MALVERN X C. AURANTIACA - Clusters of small, bold, rich golden yellow blooms for Winter season were the aim in this cross.
- #953 SLC HERMES, 'RED FLARE' X BLC MARION RYERSON, 'MIAMI' - This will make a POTINARA that should be extra fine for producing quantities of large, bold, brilliantly dark red-purple blooms. Winter or twice yearly.

So many customers want to know when hybrids listed on Page 2B, GROUP NUMBER THREE will be available as COMMUNITY-POT-LOTS that I decided to offer three of the crosses here, but not at prices quoted above.

Choose a COMMUNITY-POT-LOT from the following list at \$8.00 for the 20 seedlings, or all THREE COMMUNITY-POT-LOTS.....\$21.00.

#235 C. HYBRIDA X SLC ANZAC, F.C.C. - The most famous of all the REDS on the red-dotted, rose bifoliate should interest all who want the strikingly DIFFERENT Orchid.

#877 C. LEDA, 'MIDNIGHT' X LC GOLDEN CHARM - All should be brilliant; many should be RED. Twice yearly, Winter, Summer.

#935 C. IRIS, 'COPPER QUEEN' X SLC CARLA CARTER - Both parents as coppery gold as a brand new penny. Raspberry red lips and throats. Fall or twice yearly.

Daniel Ryerson, Box 805, Homestead, Fla. Date _____

Please fly the following community-pot-lots of bare root seedlings out of flasks - with potting mix, "raincoats" etc., to the address below.

I understand I may include community-pot-lots from GROUP NUMBER ONE and GROUP NUMBER TWO on Pages 2A and 2B at prices quoted on Page 3A. But the only hybrids available as community-pot-lots from GROUP NUMBER THREE are the three listed above, at prices quoted there.

COMMUNITY-POT-LOTS

BARE ROOT SEEDLINGS OUT OF FLASKS - average height $\frac{1}{2}$ -inch - "MAKE YOUR OWN COMMUNITY POTS!" They fly to you, with mix for topping the pot, and "rain-coat" for holding humidity in and bugs out. (See Pages C and D.)

Many Ryerson customers still prefer to "do-it-themselves", i.e., make their own 20-seedling community pots, rather than buy a 40-seedling COMMUNITY FLASK that by-passes the community pot stage -- seedlings graduating from flask to 2-inch pots.

So the following crosses are offered here ONLY as community-pot-lots. Buy 20 seedlings of any individual cross listed below, \$5.00, the seedlings, mix, etc. flying to you by PREPAID AIR MAIL - SAFE DELIVERY GUARANTEED.

Buy as many LOTS as you choose, but no MIXED lots, please. Minimum order, 20 seedlings, all the same hybrid cross.

QUANTITY PRICE - Ten or more COMMUNITY-POT-LOTS - \$4.00 per lot.

#55 C. IRIS X C. SUPERBA - Brilliant colors should abound in this bifoliate cluster hybrid, with the heavy, long-lasting blooms varying from red-brushed bronze to rich, glowing cerise. Twice yearly, Fall, Spring.

#191 LC. POSSESSION POINT X LC. TWINKLE STAR - Another bifoliate cross made with brilliant, dark, long-lasting clusters the aim; lots of gold in lip and throat. The pod parent blooms three or more times per year.

#214 C. BICOLOR X ENIDSON - Rich pink to red-brown bifoliate cluster type; twice or more yearly bloom season.

#219 C. BOWRINGEANA X LC. G. S. BALL - Heads of bronze to red-purple, perfect little Cattleya-shape blooms. Should be twice yearly.

#227 LC. KAHILI KAI X B. GLAUCA - Novelty pure white spray-type Blc; Winter or twice yearly.

#230 C. WHITE CHRISTMAS X AURANTIACA - Winter blooming bifoliate for crisp, long lasting cluster of star-shaped, clear, bright yellow blooms. No touch of any color but yellow should show up in these.

#236 C. GUTTATA X LC. GEO. S. BALL - Green-yellow to bronze bifoliate clusters for twice yearly blooms; Spring, Fall.

#237 C. ENIDSON, 'PINK PEARL' X LODDIGLOSSA - Clusters of bright pink blooms with gold throats and sprinkling of red "freckles". Twice yearly, Winter, Summer.

#238 C. FORBESII, AUREA X LC. SLENDERELLA, 'GOLDEN BUTTERFLY' - Sprays of golden yellow to orange flowers; some with maroon markings in lip. Summer.

#239 C. RED MAPLE, 'POLISHED RUBY' X LC. CHARLESWORTHII - Heavy, waxy, red-purple clusters for late Winter or twice yearly.

#247 LC. ISSY X L. FLAVA - Bronzy gold to red-brown bifoliate in sprays of polished, waxy blooms. Winter; Summer.
